The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/557,510	Applicant(s) ROBERTS ET AL.	
	Examiner Tony H. Winner	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "**The present invention relates to,**" etc.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 13-15, and 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue (USPN. 4,447,070).

Inoue discloses all of the structural (figures 1-3) as claimed, the fifth wheel hitch assembly, comprising:

- a. a head assembly (3);
- b. a jaw assembly (figure 2) carried on said head assembly, said jaw assembly including a jaw body (9) displaceable between an open position and a closed position;
- c. a control handle (1) connected to said jaw body, said control handle including a first lockable device (8);
- d. a locking bracket (3a) attached to said head assembly, said locking bracket including a second lockable device (3a, 2, and 14);

Art Unit: 3611

e. a king pin indicator (11) connected to said head assembly, wherein said king pin indicator prevents said first and second lockable devices from being locked when a king pin is not fully and properly seated in the head and jaw assemblies;

f. a king pin sensing position (movement of 11 acting on latch 5) in which said first and second lockable devices may be locked to lock said jaw body in a closed position.

Regarding claims 14-15, Inoue discloses all of the claimed limitations.

Since the structure of Inoue would result in all the method steps of claims 22-23 having been performed, those respective method steps are met by the disclosure above.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue.

Inoue discloses the claimed invention except for the mounting assembly that carries the base assembly. However, the Examiner takes Official Notice that the use of such structure is old and well known in the towing art. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have mounting

Art Unit: 3611

assembly that carries the base assembly such that it would allow the device to fit the requirement of a particular application.

Allowable Subject Matter

6. Claims 2-8, 16-20, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Anthony H. Winner whose telephone number is (571) 272-6654.
